Missingness report	99
Codebook table	99

```
knitr::opts_chunk$set(
  warning = TRUE, # show warnings during codebook generation
  message = TRUE, # show messages during codebook generation
  error = TRUE, # do not interrupt codebook generation in case of errors,
               # usually better for debugging
  echo = TRUE # show R code
)
ggplot2::theme_set(ggplot2::theme_bw())
```

Now, we're preparing our data for the codebook.

```
library(codebook)
codebook_data <- read.table("output.txt",header = TRUE)
# to import an SPSS file from the same folder uncomment and edit the line below
# codebook_data <- rio::import("mydata.sav")
# for Stata
# codebook_data <- rio::import("mydata.dta")
# for CSV
```

```
# codebook_data <- rio::import("mydata.csv")

# omit the following lines, if your missing values are already properly labelled
codebook_data <- detect_missing(codebook_data,
  only_labelled = TRUE, # only labelled values are autodetected as
                        # missing
  negative_values_are_missing = FALSE, # negative values are missing values
  ninety_nine_problems = TRUE, # 99/999 are missing values, if they
                              # are more than 5 MAD from the median
)

# If you are not using formr, the codebook package needs to guess which items
# form a scale. The following line finds item aggregates with names like this:
# scale = scale_1 + scale_2R + scale_3R
# identifying these aggregates allows the codebook function to
# automatically compute reliabilities.
# However, it will not reverse items automatically.
codebook_data <- detect_scales(codebook_data)
```

Create codebook

```
codebook(codebook_data)
```

```
## No missing values.
```

Metadata

Description Dataset name: codebook_data

The dataset has N=180 rows and 88 columns. 180 rows have no missing values on any column.

A histogram showing the distribution of values. The x-axis is labeled 'values' and ranges from 0.22 to 0.30. The y-axis is labeled 'count' and ranges from 0 to 40. The distribution is unimodal and slightly right-skewed, with a peak count of approximately 43 at a value of 0.278.
